

## BALANCED PORTFOLIO

30<sup>TH</sup> SEPTEMBER 2017

## OBJECTIVE

In contrast to our portfolios of active investment products, this TAM Passive portfolio comprises solely of passive investment vehicles (such as unit trusts and exchange traded funds) that simply track a market and aim to deliver returns reflective of how that market is performing. Asset classes you could find in this portfolio are government bonds, corporate bonds, alternatives and cash. Property and exchange traded commodities may all feature within the alternatives classification.

Passive Balanced seeks to generate capital growth over the medium to longer term, with the aim of riding out short term fluctuations in value. The portfolio will have a more balanced approach to equity exposure compared to Passive Growth - typically comprising of 50% equity and 50% non-equity - though weightings may deviate within set parameters, allowing managers to react to market conditions.

## CURRENT ASSET ALLOCATION

\*Property and exchange traded commodities may all feature within the alternatives classification

## GEOGRAPHICAL EXPOSURE

## PERFORMANCE SUMMARY\*

	1 Year	3 Year	5 Year
	5.31%	15.37%	29.71%
Calendar Year Returns		Annualised*	
2015	2016	2017	Return Volatility
0.95%	9.32%	3.43%	5.34% 4.85%

\*Launched in 2017, our TAM Passive performance figures quoted have been simulated for illustrative purposes only. Figures quoted are proforma, assuming the portfolio had tracked the FTSE All-Share and FTSE UK GILTS up to 5 Year indices as closely as possible, minus TAM fees. Data sourced from FE Analytics and calculated on the assumption that the current portfolio model was held from 1st January 2012. Annualised performance numbers are based on the historical 5 year data. Simulated past performance is not necessarily a guide to future returns. The value of investments, and the income from it, may go down as well as up and may fall below the amount initially invested.
