

PORTFOLIO OBJECTIVE

This portfolio comprises a wide range of diversified investment vehicles including unit trusts, mutual funds and exchange traded funds (ETFs), whose managers aim to outperform their respective markets. Asset classes you could find in this portfolio are equities, government bonds, corporate bonds, alternatives, commodities and cash. Absolute return, multi-asset and property may all feature within the alternatives classification.

The portfolio seeks to generate aggressive capital growth over the long term (7 years or more), and can experience very high levels of volatility in both the short and long term. Portfolios typically comprise 100% equity, though weightings may deviate within set parameters, allowing managers to react to market conditions.

STRATEGIC V CURRENT ASSET ALLOCATION

TOP 10 ASSET ALLOCATION

PORTFOLIO ACTIVITY

The second quarter has seen some bold moves within the TAM Active range with an early investment into the silver and gold market, which has quickly started delivering alpha into the portfolios. We also made a switch in its equity allocation to take profits from its successful investment into Japan, and rotated this into the UK market with the view of it faring a little better in H2. Finally, we made a switch to emerging market investments by selling down an ex-China fund and buying a straight emerging markets fund run by the same team, which has investments into China. We believe that the Chinese market, whilst not without its faults, is looking oversold and from this level should post some stable earnings numbers to the benefit of the stock market.

QUARTERLY REVIEW

Q2 was another strong month for the global equity market, with a 2.66% rally in the global equity index which TAM benchmark against. We remain in a market dominated by AI, and mega-cap US names returning a 4.14% positive return. However, a high proportion of that return is being attributed to a small number of stocks. Specifically, Microsoft, Nvidia, Eli Lilly and Meta make up 55% of the returns from the S&P 500 in the first 6 months of the year, with Nvidia delivering nearly 35% of that gain. This makes it a size and scale within the US market able to move the entire market direction on its own. However, this quarter also saw the UK return strongly from previous lows, led by smaller companies, while Europe looked fairly strong until it suffered amid general election uncertainty in France. On the bond side, it was a negative quarter for the index of corporate and sovereign debt. There were however pockets of stronger performance in emerging market debt and higher yielding bonds. The lion's share of fixed income securities has been held back this year by the increasingly lower expectations of rate cuts in 2024, starting with six quarter point cuts for the US at the start of the year, now down to one or two.

QUARTERLY OUTLOOK

The second half of the year will continue to be dominated by interest rates, elections, and the concentration in US markets of the mega-cap names. Whilst we see support for these stocks remaining, we are conscious that the rally in these names is prone to upsets from missed earnings or guidance downgrades, which could create a more volatile second half of the year for these behemoth stocks. On rate cuts, we see both Europe and the UK cutting again, perhaps in September with a 0.25% reduction in the headline rate. We think the US Federal Reserve will also begin to cut rates in Q4. Having said that, inflation as we know is not linear, and will continue to deliver both negative and positive surprises. This means that we can expect to see further volatility from interest rates and thus markets, which continue to oscillate around the direction of US inflation. Logically, the rate cutting cycle in the US is positive for bonds in both corporate and sovereign markets, but this will likely come under pressure again as Trump potentially takes back the White House and approaches the bond market for unfunded stimulus. We see the UK at a turning point off the back of the Labour landslide and expect to see some longer-term policies for growth being enacted - a step change from a Conservative party which recently largely sat on its hands.
